How to install IP Camera using RTSP Stream

## Step 1 – Settings

## Step 2 - Camera

## Step 3 - Add manually

Step 4 -- Protocol -- Custom --

Step 5 –

A. Enable

B. Show Name – add Protocol name OPTICOM

ocol identifiers us	Custom protocol 1 Enable	Show name	e op	ticom
eam Type	Туре	Transfer protocol	Port	Resource path
iin Stream	RTSP ~	TCP ~	554	cam0_0
ub Stream	RTSP ~	ТСР ~	554	cam0_1
APORTANTI Modifying the protocol will affect its associated IP channel.				
				OK Cancel
Remain Bandwidt	h: 217 / 256 Mb			

C. ADD Command -- (exactly what picture says)
Main Stream -- Change resource path to cam0\_0
Sub Stream -- Change resource path to cam0\_1
Click OK when Done -

Step 6 -- Add Manually --

Input Ip Address:

Port will be blank-

User: root

Pass: root

Protocol -- Opticom

## Click on test - if it says success then add camera
