

OPTICOM TECH

Industrial Video Specialists

Opticom Tech's Industrial Video Solutions are ideal for Steel Mills and other rugged environments.

A high quality and reliable video system can greatly increase productivity and efficiency in any industrial application. Steel mills and other heavy industrial manufacturing plants are harsh environments for video cameras. Opticom CC02 cameras are specifically designed to provide long term service in such applications. Every detail is engineered and vigorously field tested to ensure that each camera provides sharp, clear, high resolution images even when installed in an area with extreme vibration. CC02 cameras are waterproof, dust resistant and can operate in extreme temperature ranges.

Opticom Tech provides complete systems including industrial grade digital recorders and a full line of high definition LCD monitors. Real-time video solutions are available in IP, HDTV and analog formats and are fully scalable to any size plant.

All systems are remotely accessible from any network connected PC, tablet or phone whether locally or from around the world. Our video products are fully backed by our industry leading warranties, comprehensive technical support and exceptional customer service.

ADDITIONAL BENEFITS OF ADDING A VISUAL SYSTEM:

- Monitor operations
- Increase productivity
- Reduce downtime
- Improve security & safety

CC02
